Dr. Thomas P. Fraser
NSF Institute Director
Morgan State College
Baltimore, Maryland

Dear Dr. Fraser:

Since my experience with the Fourth NSF Summer Institute at Morgan State College, I have intended to write to you to express my gratitude for the privilege of such a rewarding opportunity.

Morgan State College is truly blessed with the presence of Dr. C. F. Stephens as an instructor. In all of my training experience, I have never witnessed a more competent mathematics teacher than Dr. Stephens. Fortunate are the students who share his knowledge.

At present, I am attending the NSF-AYI at Boston College. The experience here is both challenging also. However, without the modern mathematics background that I received from Dr. Stephen's instructions my beginning here would have been most difficult.

I am also interested in knowing whether or not credits and grades from the Fourth Summer Institute were sent to the participants. I ask this information because I am now in the process of seeking a teaching position effective September 1961. This information will tell me how to give proper recognition of my summer study on my application forms. If grades were sent, I could have failed to receive mine because of change of address. However, will you kindly inform me of the number of semester credits that I received from the institute?

I sincerely hope the participants of the Fifth Summer Institute will be cognizant of the opportunity granted them.

Sincerely,

/S/ Nena Mae Faulcon
